The Homeowner's Guide to CHOOSING A ROLLER GARAGE DOOR

How to choose a door that delivers proven security, lasting quality and *real* value for money.

Inside You'll **Discover:**

- WHY SOME DOORS COST LESS
- THE HIDDEN COMPROMISES TO AVOID
- WHAT MAKES A SECURE GARAGE DOOR
- COMPARING DOORS WITH CONFIDENCE

The **HIDDEN COST** of a Cheap Garage Door

Many roller garage doors look almost identical from the outside. What you can't see is what matters most; the materials, engineering and security built inside.

While budget doors often compete on headline price alone, SeceuroGlide Roller Garage Doors are designed to protect your home for many years, with fewer problems and lower lifetime ownership costs.

Four Reasons to **Think Beyond Price**

1. ENHANCED SECURITY
   Cheap doors often use basic locking systems and lower-grade components. Choose independently tested security for verified protection.
2. SUPERIOR ENGINEERING
   Look for premium components and quality automation, for smoother operation, ultraquiet running, fewer repairs and a longer life.
3. A WARRANTY YOU CAN TRUST
   Choose a long-established manufacturer, with long-term, dependable warranties, ongoing parts availability and expert aftersales support.
4. BETTER VALUE
   Saving money today can lead to higher repair bills, reduced reliability and the need to replace your roller garage door much sooner than expected.

True value is measured over the lifetime of the door, not the day you buy it.

What Makes a **SECURE** Garage Door?

Your garage protects your car and tools while often providing access to your home. Security should never be an afterthought. Look for **independent accreditation** – not marketing claims.

Insurance Approved

The first roller garage door to achieve LPCB LPS 1175 Level 1 certification, the SeceuroGlide Excel is recognised by insurers as **the most secure garage door** on the market.

Police Approved

Both the SeceuroGlide Original and Excel are **independently attack tested** to recognised security standards and made to a police preferred specification.

Security **Built-in**

SeceuroGlide Original & Excel

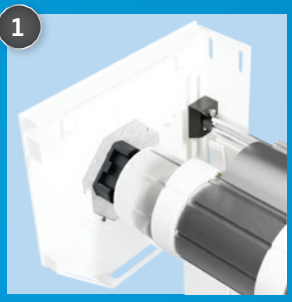
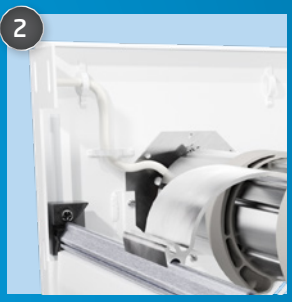
*SeceuroGlide Excel only.



1 Heavy-duty steel end plates



2 Solid aluminium locking straps & top rail

3 Widespan 90 mm guide channels

4 Uprated 100 mm fluted axle

5 Additional locking points

6 Unique security webbing system

7 Reinforced locking bottom slat*

8 High security guide anchor*

CHOOSE ONCE
Enjoy for Years

A quality garage door is used thousands of times throughout its life. Investing in quality means greater security, smoother operation and lower lifetime ownership costs.

Before You Buy, Ask...

- Is it independently tested?
- Does it carry recognised security certification?
- Who supports the warranty?
- Will replacement parts still be available in years to come?
